Contents of Volume 61

Volume 61, Number 1, November 6, 1974

AUTHOR INDEX, Volume 61, Number 1	ii
HIDEO HAYASHI and JOHN T. PENNISTON. Energy Dependent Endocytosis by Erythrocyte Ghosts V. Effects of Neuraminidase and Pronase Digestion	1
M. J. DENTON, H. T. DELVES, and H. R. V. ARNSTEIN. The Mobilization of Iron from the Cell Stroma during Erythroid Maturation	8
SHENG-CHUNG LEE and LAWRENCE LEVINE. Purification and Properties of Chicken Heart Prostaglandin Δ^{13} -Reductase	14
STUART H. KORETZ and G. V. MARINETTI. Binding of 1-Norepinephrine to Isolated Rat Fat Cell Plasma Membranes. Evidence against Covalent Binding and Binding to Catechol-O-Methyl Transferase	22
G. V. MARINETTI and R. LOVE. Extent of Cross-Linking of Amino-Phospholipid Neighbors in the Erythrocyte Membrane as Influenced by the Concentration of Difluorodinitrobenzene	30
R. A. RUSH, S. H. KINDLER, and S. UDENFRIEND. Homospecific Activity, an Immunologic Index of Enzyme Homogeneity; Changes during the Purification of Dopamine- β -Hydroxylase	38
F. ROBERT TABITA, S. E. STEVENS, JR., and REYNALDO QUIJANO. D-Ribulose 1, 5-Diphosphate Carboxylase from Blue-Green Algae	45
TOSHIO KANEKO, HIROSHI OKA, MASAHIDE MUNEMURA, SEIJI SUZUKI, HIROKO YASUDA, TOSHITSUGU ODA, and NOBORU YANAIHARA. Stimulation of Guanosine 3',5'-Cyclic Monophosphate Accumulation in Rat Anterior Pituitary Gland <i>in Vitro</i> by Synthetic Somatostatin	53
FRANK R. KATTERMAN and WILLARD F. CLAY. Denatured Helical Sites and Ribonuclease Resistant RNA Associated with DNA from the Dormant Seeds of a Higher Plant	58
JAMES P. CHEN, HELEN M. SHURLEY, and MARTHA F. VICKROY. A Facile Separation of Fragments D and E from the Fibrinogen/Fibrin Degradation Products of Three Mammalian Species	66
DAISABURO FUJIMOTO. Serotonin-Sensitive Aryl Acylamidase in Rat Brain	72
HIDETSUGU NAKAZAWA, HIDEHIKO KUMAGAI, and HIDEAKI YAMADA. Constitutive Aromatic L-Amino Acid Decarboxylase from <i>Micrococcus percitreus</i>	75
K. SAITO, R. TERASHIMA, T. SAKAKI, and K. TOMITA. The Crystal and Molecular Structure of Cytosine-Glycyl-Glycine-Copper (II) Complex, a Biologically Important Ternary Coordination Complex	83
PETER Y. CHOU. β -Sheet Aggregation Proposed in Sick Cell Hemoglobin	87
Y. KOCH, T. BARAM, P. CHOBSIENG, and M. FRIDKIN. Enzymatic Degradation of Luteinizing Hormone-Releasing Hormone (LH RH) by Hypothalamic Tissue	95
T. PRANGE, C. GARBAY-JAUREGUIBERRY, B. ROQUES, and M. ANTEUNIS. High Field ^1H NMR Studies. Influence of the Cis/Trans Isomerism on the N-Acetyl 4-Hydroxy Proline Ring Conformation	104
HECTOR JUAREZ, DOLORES JUAREZ, and CHARLES HEDGCOTH. Seven Lysine Isoaccepting tRNA's from Polyoma Virus-Transformed Cells	110
H. SCHLEGEL and P. CHRISTEN. The Apo/Holo Hybrid of Cytosolic Aspartate Aminotransferase, Preparation and Studies on Subunit Interactions	117
PETER R. SINCLAIR and S. GRANICK. Uroporphyrin Formation Induced by Chlorinated Hydrocarbons (Lindane, Polychlorinated Biphenyls, Tetrachlorodibenzo- <i>p</i> -Dioxin). Requirements for Endogenous Iron, Protein Synthesis and Drug-Metabolizing Activity	124
M. S. KAULENAS and B. R. UNSWORTH. Appearance of a Kidney-Specific Ribosomal Protein during Mouse Embryonic Development	134
B. LISOWSKA-BERNSTEIN and P. VASSALLI. Mouse Thymocyte Immunoglobulin: Can Proteolysis Explain Difficulties in its Detection?	142
P. W. TAYLOR. An Unusual Acidic Polysaccharide Produced by a Rough Strain of <i>Escherichia coli</i>	148
F. LAMBEIN and R. VAN PARIJS. New Isoxazolinone Amino Acids from <i>Lathyrus Odoratus</i> Seedlings	155
EGLIS T. LODE, CHERYL L. MURRAY, and JESSE C. RABINOWITZ. Semisynthetic Synthesis and Biological Activity of a Clostridial-Type Ferredoxin Free of Aromatic Amino Acid Residues	163

ROBERT B. RAMSEY, AHMED ATALLAH, MICHAEL FREDERICKS, and HAROLD J. NICHOLAS. The Effect of Nonionic Detergents and Phospholipase A on Enzymes Involved in Adult Rat Brain Sterol Biosynthesis from (2- ¹⁴ C)-Mevalonic Acid <i>in Vitro</i>	170
KIN-PING WONG and HASKO H. PARADIES. Shape Properties of Proteins L7 and L12 from <i>E. coli</i> Ribosomes	178
K.-H. ADAM K. STROHMAIER. Isolation of the Coat Proteins of Foot-and-Mouth Disease Virus and Analysis of the Composition and N-Terminal Endgroups	185
IRENE C. SUN, LUCILLE SHAPIRO, and ORA M. ROSEN. Purification and Characterization of Guanylate Cylase from <i>Caulobacter crescentus</i>	193
TH. J. C. VAN BERKEL. Difference Spectra, Catalase and Peroxidase Activities of Isolated Parenchymal and Nonparenchymal Cells from Rat Liver	204
O. R. ZABORSKY and J. OGLETREE. The Immobilization of Glucose Oxidase via Activation of its Carbohydrate Residues	210
HITOSHI SHICHI, ROBERT L. SOMERS, and PAUL J. O'BRIEN. Phosphorylation of Rhodopsin: Most Rhodopsin Molecules are not Phosphorylated	217
J. O. AKPAN, R. GARDNER, and S. R. WAGLE. Studies on the Effects of Insulin and Acetylcholine on Activation of Glycogen Synthase and on Glycogenesis in Hepatocytes Isolated from Normal Fed Rats	222
JOHN C. MAXWELL, CLYDE H. BARLOW, JULIAN E. SPALLHOLZ, and WINSLOW S. CAUGHEY. Utility of Infrared Spectroscopy as a Probe of Intact Tissue: Determination of Carbon Monoxide and Hemeproteins in Blood and Heart Muscle	230
KEITH MOFFAT and QUENTIN H. GIBSON. The Rates of Polymerization and Depolymerization of Sick Cell Hemoglobin	237
TSUKASA NISHIKIDO and TOMKICHI WADA. Comparative Studies of NADP-Malic Enzyme from C ₄ - and C ₃ - Plants	243
STEVEN R. GOODMAN, ROBERT M. HOUSER, and ROBERT E. OLSON. Ineffectiveness of Phylloquinone Epoxide as an Inhibitor of Prothrombin Synthesis in the Rat	250
KOSTAS P. VATSIS, JUDITH A. KOWALCHYK, and MARTIN P. SCHULMAN. Ethanol and Drug Metabolism in Mouse Liver Microsomes Subsequent to Lipid Peroxidation-Induced Destruction of Cytochrome P-450	258
ALAN J. BEARDON, WILLIAM T. MORGAN, and URSULA MULLER-EBERHARD. Heme Complexes of Rabbit Hemopexin, Human Hemopexin and Human Serum Albumin: Electron Spin Resonance and Mössbauer Spectroscopic Studies	265
L. B. DOLAPCHIEV, E. SULKOWSKI, and M. LASKOWSKI, SR. Purification of Exonuclease (Phosphodiesterase) from the Venom of <i>Crotalus adamanteus</i>	273
D. H. SCHLESINGER, H. D. NIALI, and D. WILSON. Localization of Translation Initiation in the Message for <i>E. coli</i> UDP-Galactose 4-Epimerase: The Amino Terminal Sequence	282
S. G. SLIGAR, J. D. LIPSCOMB, P. G. DEBRUNNER, and I. C. GUNSALUS. Superoxide Anion Production by the Autoxidation of Cytochrome P450 _{cam}	290
R. A. CHAPLAIN and U. GERGS. Regulatory Effects of ATP and Calcium on the Myofibrillar ATPase of Frog Sartorius Muscle	297
F. LEMONNIER, C. GREGORI, and F. SCHAPIRA. Possible Role of Thiol Groups in the Abnormal Kinetics of Aldolase in Hereditary Fructose Intolerance	306
Y. HATEFI, D. L. STIGGALL, Y. GALANTE, and W. G. HANSTEIN. Mitochondrial ATP-P _i Exchange Complex	313
JULIAN SCHEINBUKS, PAUL S. SYPHERD, and KIVIE MOLDAVE. Studies on the Structure and Function of Ribosomes from Regenerating Rat Liver	322
DAVID A. HAWLEY, MARTHA J. MILLER, LAWRENCE I. SLOBIN, and ALBERT J. WAHBA. The Mechanisms of Action of Initiation Factor IF-3 in Protein Synthesis Studies on Ribosomes Crosslinked with Dimethylsuberimide	329
MICHAEL V. KEENAN and CHARLES M. ALLEN, JR. Phospholipid Activation of <i>Lactobacillus plantarum</i> Undecaprenyl Pyrophosphate Synthetase	338
JOSEPH A. D'ANNA, JR. and IRVIN ISENBERG. Interaction of Renatured Histones f3 and f2al	343
ARVAN L. FLUHARTY, RICHARD L. STEVENS, RUBY T. MILLER, and HAYATO KIHARA. Sulfoglycerogalactolipid from Rat Testis: A Substrate for Pure Human Arylsulfatase A	348
M. S. SAIRAM, W. CRAIG CLARKE, DAVID CHUNG, JERKER PORATH, and CHO HAO LI. Purification of Antibodies to Protein Hormones by Affinity Chromatography on Divinylsulfonfyl Sepharose	355

CONTENTS OF VOLUME 61

J. E. ALYING and G. D. HELFAND. Inhibition of Phenylalanine Hydroxylase by <i>p</i> -Chlorophenylalanine Dependence on Cofactor Structure	360
JOHAN A. VAN DEN BERG, TEAKE KOOISTRA, A. B. GEERT, and MAX GRUBER. Effect of Estradiol on the RNA Content and the Activity of Nucleolar RNA Polymerase from Rooster Liver	367
P. V. HARIHARAN and P. A. CERUTTI. The Incision and Strand Rejoining Step in the Excision Repair of 5,6-Dihydroxy-Dihydrothymine by Crude <i>E. coli</i> Extracts	375
M. SLUYSER, S. G. EVANS, and T. NIJSSEN. Binding of 5S Estradiol Receptor to Poly-Deoxynucleotides	380

ERRATA

Volume 60, Number 1, September 9, 1974: Charlyn D. Murray, Pattle Pun, and N. Strauss, Template Specificity Changes of DNA-Dependent RNA Polymerase in <i>B. Subtilis</i> During Sporulation, pp. 295-303	389
Volume 59, Number 4, August 19, 1974: T. Kagawa and M. D. Hatch, C ₄ -Acid as the Source of Carbon Dioxide for Calvin Cycle Photosynthesis by Bundle Sheath Cells of C ₄ -Pathway Species <i>Atriplex spongiosa</i> , pp. 1326-1332	389

Volume 61, Number 2, November 27, 1974

AUTHOR INDEX, Volume 61, Number 2	ii
J. W. JACOBS, H. D. NIALI, and G. W. G. SHARP. The Amino Terminal Sequence of Cholera Toxin Subunits	391
A. RICHARD MORGAN and DAVID E. PULLEYBLANK. Native and Denatured DNA, Cross-Linked and Palindromic DNA and Circular Covalently-Closed DNA Analyzed by a Sensitive Fluorometric Procedure	396
MICHAEL C. WILSON, MARIALUISA MELLI, and MAX L. BERNSTIEL. Reiteration Frequency of Histone Coding Sequences in Man	404
MICHAEL A. SIROVER and LAWRENCE A. LOEB. Infidelity of DNA Synthesis: A General Property of RNA Tumor Viruses	410
DORIS S. KENNEDY, ANDRE J. BESTER, and STUART M. HEYWOOD. The Regulation of Protein Synthesis by Translational Control RNA	415
G. A. CODD, P. ROWELL, and W. D. P. STEWART. Pyruvate and Nitrogenase Activity in Cell-Free Extracts of the Blue-Green Alga <i>Anabaena cylindrica</i>	424
S. I. CHAVIN. Membrane Associated Immunoglobulin in Pig Thymocytes	432
JAMES S. HUSTON, W. F. MOO-PENN, KATHERINE C. BECHTEL, and OLEG JARDETZKY. Characterization of the Lac Repressor Species Produced by Limited Tryptic Cleavage	441
J. JÄNNE and E. HÖLTÄ. Regulation of Ornithine Decarboxylase Activity by Putrescine and Spermidine in Rat Liver	449
JOHN E. MOLE, AJIT S. BHOWN, and J. CLAUDE BENNETT. The Amino Acid Sequence of the C-Terminal Cyanogen Bromide Peptide of Human J Chain	457
MICHEL GUERINEAU, PIOTR P. SLONIMSKI, and PHILIP R. AVNER. Yeast Episome: Oligomycin Resistance Associated with a Small Covalently Closed Non-mitochondrial Circular DNA	462

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) 115, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a footnote**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [³²P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1974) 160, iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. Do not attempt to insert figures, figure legends or tables into the text. This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1969. Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* 142, 363-370.

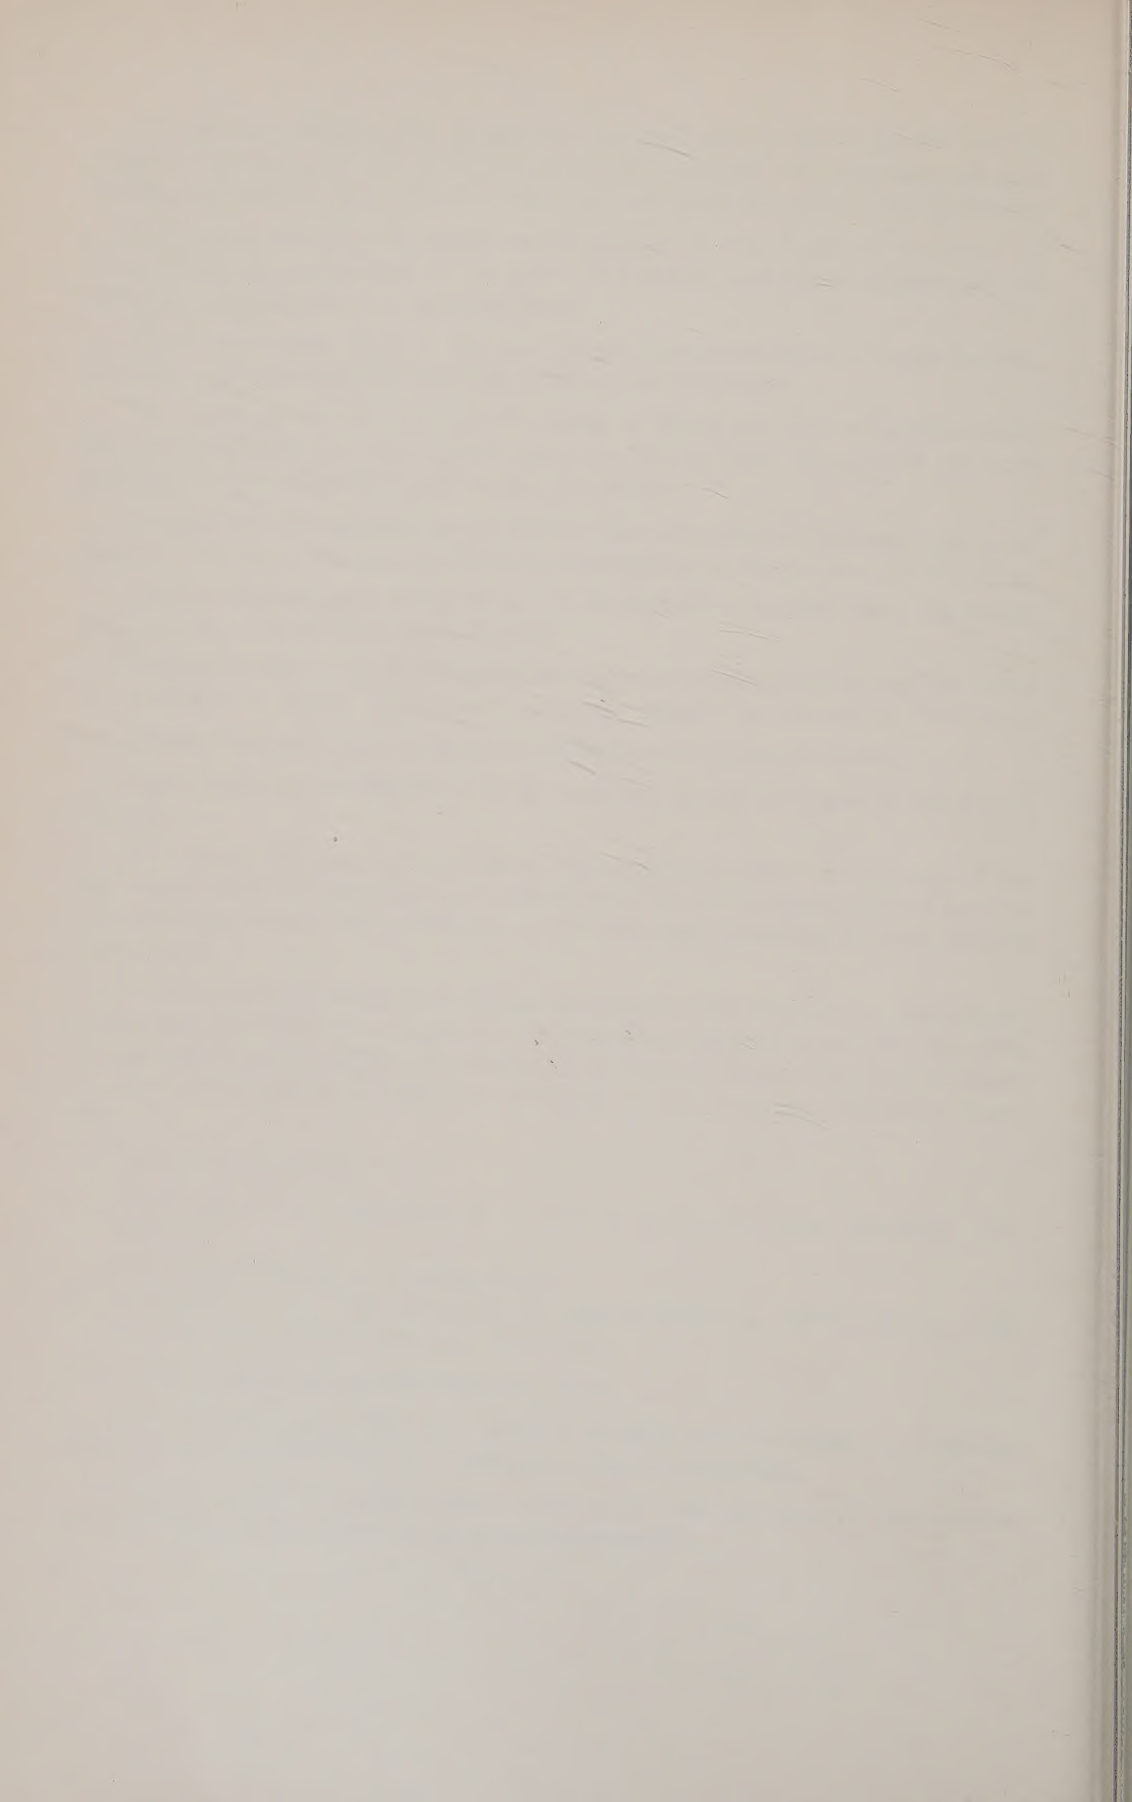

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) *Cyclic AMP*, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
